

Real-time feedback, inside your design environment

Sefaira Architecture provides feedback on daylighting and energy directly within the SketchUp and Revit modelling environments—so you can focus on design, not “analysis.”

Beautiful, customizable daylighting outputs

Sefaira’s Daylighting Visualization is fast, intuitive, and simple to set up. Create beautiful, customized graphics to support your design narrative.

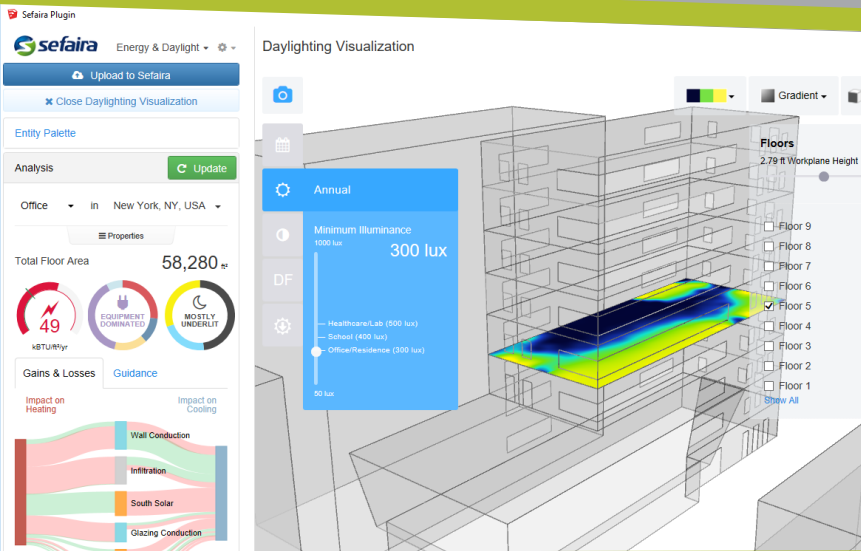

Collaboration in the Cloud

Upload SketchUp and Revit geometry to the Web Application to collaborate in real time on a common analysis model.

Industry-standard analysis engines

EnergyPlus™, Radiance and Daysim drive Sefaira’s analyses. Confer confidently with your team and your client as you consider potential design solutions.
